EXPERIENCE

Software Developer II, Fifth Sun
Chico, CA — September 2017 - Present

Solely responsible for refactoring an existing manufacturing web application into a desktop application using the Electron framework. Redesigned the UI for a more pleasant user experience. Also responsible for the design, development, implementation and maintenance of other software systems in the company.

Web Developer & QA Team Lead, Navigation North
Chico, CA — July 2016 - September 2017

Translated mockups to code, implemented new features and maintained the code base for the Smithsonian Learning Lab. Managed, tested and fixed code from an overseas development team. Interfaced with the client and facilitated quality in both design and functionality.

Mentor/Developer, DevMountain
Provo, UT — April 2016 - August 2016

Mentored students as they completed the Full Immersive Web Development program. Contributed to DevMountain's internal codebase. Prepared and lead workshops in JavaScript Design Patterns, HTML/CSS, and more.
